

A Cost-Effective Alternative

ResulTV-VDM is a simplified version of ResulTV. Like the VDM option for Vision-series cameras, the content of the ResulTV-VDM layout is controlled by the data received.

The source applications (FinishLynx, FieldLynx, FieldLynx Lite or LynxPad) come standard with pre-defined and customizable ResulTV-Video scoreboards scripts to create modern and eye-catching layouts for all types of events.
